

Arjun Mehta

arjun.mehta@email.com | +91-9876543210 | Bangalore, India

Professional Summary

Senior Software Engineer with 6 years of experience building scalable distributed systems. Expertise in Python, Go, and cloud-native architectures. Led a team of 4 engineers at Flipkart building real-time recommendation pipelines processing 50M events/day.

Skills

Python, Go, JavaScript, React, Node.js, PostgreSQL, MongoDB, Redis, Apache Kafka, Docker, Kubernetes, AWS (EC2, S3, Lambda, ECS), Terraform, CI/CD, GraphQL, Machine Learning, TensorFlow

Experience

Senior Software Engineer - Flipkart (2021-Present)

- Led real-time recommendation engine processing 50M events/day
- Reduced API latency by 40% through Redis caching layer
- Mentored 3 junior engineers through the oncall rotation

Software Engineer - Zoho (2018-2021)

- Built microservices architecture serving 10K RPM
- Migrated monolith to Kubernetes, reducing deployment time by 70%
- Designed event-driven pipeline using Apache Kafka

Projects

EventFlow - Real-time event processing framework (Go, Kafka, PostgreSQL)

SmartCache - Intelligent caching layer with ML-based eviction (Python, Redis, TensorFlow)

DevDash - Developer productivity dashboard (React, Node.js, GraphQL)

Education

B.Tech Computer Science - NIT Trichy (2018)

Certifications

AWS Solutions Architect Associate

Certified Kubernetes Administrator (CKA)
